

Mercado-Medic REAL 9100 Plus EL

manual task chair for indoor mobility

A powered sit-stand chair available with electric seat height, seat tilt and braking and a host of adaptations to support an independent lifestyle.

This manual disability chair is designed to give someone with moderate postural needs or leg weakness mobility support and assist them around the office, home or other indoor environment. The functions of the chair make a variety of everyday tasks possible like working at a counter, laboratory bench or kitchen worksurface, reaching high places, standing or transferring out of the chair.

These specialist disability chairs are prescribed to an individuals' needs and provide unparalleled ergonomic posture and comfort for extended periods of sitting with many user adjustments and a range of cushions and supports. There are also specific models in the same product group for individuals of short stature, children and large users.

Adaptability

This bespoke disability chair is built from the ground up to suit a specific physical impairment and makes use of a vast selection of different seats, backrests, arm supports, headrests, leg rests and hundreds of standard elements. Angles and positions can be adjusted by the user both manually and at the push of a button to suit different activities during the course of a day.

For progressive conditions Mercado Medic chairs are future-proofed with unprecedented scope to be adapted and retrofitted with alternative components or accessories with a minimum of fuss.

Manoeuvrability

The ultra-compact special base is designed so that the chair can be 'walked' around and tilting the chair seat forwards allows the feet to make firm contact with the floor. Optional large wheels with push-rims can be added for hand propulsion.

The omnidirectional castors have ultra-low friction bearings for a smooth-running experience.

Safety

This specialist manual task chair is designed to offer safe and secure help to users with mobility challenges. The REAL 9001 Plus EL has a stable, fully-welded frame made from Swedish steel of the highest quality and other components are designed with durability in mind offering many years of safe use.

The patented brake system is a key safety feature of the chair and makes the chair superbly stable when it is elevated or when getting in and out of the chair

Mercado Medic chairs are approved in accordance with SS-EN 1335, 1-3 and bear the CE mark

Comfort

This task chair can be continuously adjusted throughout the day promoting dynamic sitting which benefits anyone who uses a chair for extended periods of time. The tilt in space feature offers a recuperating posture to users between activities.

A wide variety of seat cushion and backrest sizes are available to facilitate better fit and comfort. With the help of consultant physiotherapist Bengt Engström Mercado medic have developed a seating system comprising moulded seat base and back, head and arm rests. Optional seat belts, footplate supports, side bolsters etc. are all available for increased support if required.

The REAL 9100 EL upholstery is available in various materials and colours, all practical, hard wearing and comfortable for long periods of sitting.
